It's extremely difficult to know what life is really like in a country or a region whose culture one has never experienced directly. These days, it's very easy to have the illusion of knowing what it will be like from images furnished by the internet, media, books and people's comments.

Our Language immersion programs are designed to optimise language experience and strengthen a deeper cultural understanding of their target language's region and its people.

**Your time in country is a valuable way of enriching your language skills and cultural knowledge. You will learn a tremendous amount from just living and learning in a new social and cultural environment, meeting the locals and experiencing life first hand...knowing you have the security, support and experience of our professional team behind you.**
